Dance in the content physicians of England, has not blessed a work entitled "A Physician's Holiday; or, a Month in Switzerland." In this he disease a popular prejudee respecting the use of water when the body is heated by exercise. Those who have charring but weather will have reparked that the soldiers, on a halt, being called drink freely, while prespiration pours down their cheeks, of the nearest and coldest water they can find; and marsover, that they would in some future time, be the centre of a gigantic empire generally considered highly dangerous receives the doctor's sauction, with the sole provise that the body shall not be if an exhausted state, and the quantity of water awallowed chall not be exorbitantly large. "So long," he says, "as the peters of the course of the course of the season of the course of the season of the course of the season of the season of the course of the season of the course of the season of the season of the season of the course of the season of t at every spring he passes in his way.—
So far from the simply heated state of the body being here an element of danger, I believe the hotter the individual is, provided he do not exhausted, and provided he do not drink an excessive amount of water, the refer is the precise." Such an asthe safer is the practice." Such an assurance, from so high an authority, descrees an especial record and widespread circulation.—Boston Gazette.

of the numbers of Steamboats built. We give the following aggregates of the number of Steamers built in the United States, since 1824—twenty-five years in periods of five years each.

## Sensible.

The New Yorker, a well conducted penny paper, remarks, if the woman who get up Women's Rights Conventions at Wor-cester and elsewhere, were half as isdus-trious in keeping their children's clothes patched, and their kitchens attractive, they might secure all the political and moral influence of their families, without troubling the ballot box. If they are bent on the tons! elective franchise instead of making their homes neat and happy, we urge that they this business. From the Reports on Commerce for the years 1846, '48 and '49, we find, that in three years, the Steamboats gering, to pounding payoment, working on the roads, militia exercises, police etc. When will woman learn that their best strength is their femininity; their truest dominion the empire of home?

AFFRAYS .- The Red River Republican, of the 12th ult., announces two more affrays in Rapides parish. In the first, Wun.

Martin, jr., cut N. Rache with a knife,

Thus we see that I ers built in the Unio waters of the west.

The proportions by inflicting a severe wound, from which, however, it is thought he will recover. In the second, Dr. Weems shot S. A. Bloomfield. Both parties fired, the former twice with a gun, and the latter once with a pistol. Mr. B. is considered in a critical situation. Dr. Weems has been held to bail in the sum of \$500.

There is a man in New Orleans, who ten years ago was a porter in a store in Pearl street, New York—afterwards went west, and in consequence of the reduced state of his finances, was obliged to work his passage from Louisville to New Or leans—who is now worth \$300,000. On his arrival in that city he managed to work himself into a small business, and as fast as he carned a dollar, he spent it in adver-tising. By this means his establishment in a short time became the talk of the city, and he was run down with business; and in a little over six years, he has acquired a princely fortune.—So much for adver-

## Gilbert Dead !--- The Fugitive Slave Cap-

The Maysville Eagle, of Saturday, in an nouncing the death of Mr. Gilbert, says: We regret to learn that Mr. William Gil-bert, of Brown county, Ohio, who was shot by a runaway negro, on Tuesday night, as noticed in our last, has since died. The negro, before the death of Gilbert, had been times as many, as in 1826. Thus we see captured by another party and lodged in the one element of the growth of Western Com-Mason county jail, in this city. He belongs to Mr. Howard, of Mt. Sterling. We take it for granted he will be demanded by the Governor of Ohio, and put on trial there for the murder of Gilbert.

A company from Boston is at present engaged with a sub-marine apparatus in endeavoring to recover the lost treasure on 27, 1850, and which took effect on the 1st board the steamer Lexington, which was day of the present month, no bill of sale destroyed by fire in Long Island Sound in mortgage, hypothecation, or conveyance of January, 1840. The wreck lies 120 any vessel, or part of any vessel, shall be feet below the surface.

PECULIARITIES OF EGYPTIAN WOMEN.-The lower orders are extremely noisy and nothing can equal the volubility of the women. The fair sex of Egypt appear generally well made, except about the bust; but their features-I mean those of the humbler classes-are harsh and coarse .-I do not think this arises either from exposure to the sun or hard work. The same observation is not made in India- All I women are strongly developed, and that in language and manners they bear a resemblance to the lower order of the Irish, The fierceness of their quarrels are sometimes surprising. I have seen an old dame for a whole quarter of an hour per. severingly attempt to get to a young man who had offended her, in order to scratch his face. Her tongue never ceased to utter all the while the most awful curses, and she actually foamed at the mouth, and throwing herself on the ground, rolled about in transports of impotent rage. According to the custom of the country, however, she did not turn upon those who held her. Let me lasten to add that never have I seen tenderer mothers than in Egypt. It is my impression, indeed, tho' I should not like to be too positive on such a subject, that maternal affection is the only pure passion of which the Egyptian women, as a rule are capable. I have often heard it said by them, "A husband is a husband; if one is lost another is to be got; but who can give me back my chlid?" -Two Years in a Levantine Family.

MRS. PARTINGTON. - Well, I do declaim Mas. Parrisoron.— Well, I do declaim its an extorishing piece of rascality, for them 'ere stentors of Congress, to be deceiving eight dollars a day for ructifying the figurative slave pill; what on nirth do they mean! I think them homes of Congress, and the members, want just as much cleaning as them hard-gan stables, what Hersbel scrubbed, and took him over ten thousand years. I wash I had the job of rengradies 'en. Pigurative slave pill indeed?' mattered the old lady, as she laid down the paper.

mustances, I believe he may freely in-mous Commerce to which this country has now arrived. We may add on passant, that

boats built in the Union, are built in Ohio, and one-seventh part built in Cincinnati. The largest number of steamers built, at one place, are built in Pittsburgh, and its steamboat building at Pittsburgh or Cincin-

As to the number of steamboats moving

In the last five years, there have been built 1,000 steamboats, and of those 700 were built in the West. The life of steamboat does not average more than five years, on the Western rivers, but, there are a large number of boats, which have been patched up, and are much older than five merce; a Commerce, whose magnitude ments .-- Cin. Chronicle & Atlas.

## Important to Owners of Vessels. By an act of Congress, approved July

valid against any person-other than the grantor or mortgager, his heirs and devisees, and persons having actual notice thereof, unless the same be recorded at the office where such vessel is enrolled or registered. Collectors of customs are instructed to procure suitable books for making the records aforesaid, and all certificates for discharging and cancelling the same in the order of their reception, and to furnish certified copies when required, &c. Owners of vessels upon taking out know is that the passions of the Egyptian registers, or enrolments, are required, in addition to the oath of ownership heretofore made, to swear to the share or proportion held by each owner, and the Colactor is required to insert the same in the register or enrolment then to be issued. The act was approved July 29, 1850.

> More Caving In .- The Natchez Courier states that the river bank is caving in very much in the upper part of that city, in the neighborhood of Mr. Andrew Brown. They were busy all day Sunday in removing the machinery from his planeing mill, and on Monday it slid from its foundation. The building used by him as drying shop for seasoning lumber, has

There has been another caving in of the levee at Plaquemines, La. A number of houses and a large amount of property has been destroyed.

VIRGINIA CONVENTION.—This body was occupied the whole of Wednesday in discussing whether or not it would adopt, as one of its rules, the application of the "previous question," and finally agreed to allow a debate of ten minutes thereupon. The report of a committee recommends that the salaries of the officers of the Convention be as follows .- President, \$8 per day; Secretary, \$100 per week; Ser-geant-at-Arms, \$30 per week; Door-Keepers, each \$28 per week; and the Pages, \$14 per week. The report was, for the present, laid on the table.

Physician's faults are covered with earth and rich men's with money.

TRICKS OF QUACKS.

Let Everynov Read the Camerdiay.—There is a Sarssparilla for sale in the different towns catled S. P. Townsend's Sarsaparilla. It is advantaged as the ORIGINAL, GENUINE, and all test. This Townsend is no doctor and never was; but was farmerly a worker on railroads, canals, and the like—yet he assumes the title of Doctor for the purpose of gaining credit for what he is not. He says "to has attended two medical schools, and practiced for fifteen years!" Now the truth in, he never practiced medicine a day in his life? Such selful, reteled misrappresentation looks had to the character and survetly of the man. I wish most sincerely, he had never made three statements of himself or of me. When will men tearn to be honest and truthful in all their dealings and intercourse with their fellowmen! He applied to one Ruel Chapt is assist him in manufacturing his mixture, stating the large sums be would make, as an inducement to embark in the business. These men have been insulting and libering me in all possible forms, in order to impress the public wish the belief that the Old Boctor's Sarasparilla was not the genuine, original levels. This S. P. Townsend says I have sold the use of my name for \$f. a week. I will give him \$520 if he will produce one sincts solitary proof of this. His statements of Thompson, Bikillman & Ca., are nothing but it least of alsoheds, emply made to desire the public, and keep the truth down in regard to his souring, fermenting conjound. This is to caution the public to purchase none but Old Dr. JACOB Townsend's Sarasparilla, having on it the Old Doctor's likeness, his family Cont of Arms.

Principal Office, 102 Nassent street, N. Y. City.

JACOB TOWNSEND.

Old Dr. Jacob Townsend, Genuine Townsend Sarsaparilla. Old Dr. Townsend is now about 70 years of mer, and has long been known as the AUTHOR and DISCOVERER of the O'E NUINE ORIGINAL "TOWNSENIU SARSAPARILLA". Being paor, he was compelled to limit its manufacture, by which means it has been kept our of market, and the sales circumscribed to those only who had proved the worth, and known its value. It has reached the ears of many, nevertheless, as those persons who had been healed of sore discusses, and saved from death, are claimed its wanterful.

HEALING POWER.

HEALING POWER.

This GRAND AND UNEQUALLED PREPARATION is manufactured on the largest scale, and is called for throughout the length and breadth of the land, especially as it, is found incapable of degeneration or deterioration.

Unlike young S. P. Townsend's, it improves with age, and never changes but for the better: because it is prepared on scientific principles by a scientific man. The highest knowledge of Chemistry, and the lainst discoveries of the art, have all been brought into requisition in the manufacture of the Gld Dr's Saranjarilla. The Saranjarilla rocit is well known to medical men, contains many medicinal properties, and some properties which are inert or useless, and others, which if retained in preparing it for use, produce fermentation and acid, which is injurious to the system. Some of the properties of Saranjarilla are so velatifie that they entirely evaporate and are lost in the preparation, if they are not preserved by a scientific process, known only to those experienced in its manufacture. Moreover, these volatile principles, which fly off in vapor, or as an exhalation, under heat, are the very essential medical properties of the root, which give to it all its value.

Any person can boil or stewith root till they get a dark colored liquid, which is more from the coloring matter in the root than from anything cise; they can then strain this infield or vapid liquid, sweeten with soft molasses, and then call it "SARSAPARILLA EXTRACT or SYRUP"

But such is not the article known as the

But such is not the article known as the GENUINE OLD DR JACOB TOWNSEND'S SARSAPARILLA. SARSAPARILLA.

This is so prepared that all the mert properties of the Sarsparilla root are first removed, anything capable of becoming acid or fermentation is extracted and rejected, then overy particle of medical virtue is secured in a pure and concentrated form; and thus it is rendered incapable of losing any of its valuable and healing properties. Prepared in this way, it is made the most powerful agent in the Curre of insummerable Discarces.

Hence the reason why we hear commendations on every ride in its favor by men, women, and children. We find it doing wonders in the cure of CONSUMPTION, DYSPEPSIA, and LIVER-COMPLAINT, and in RHEUMATISM, SCROP, ULA, PILES, COSTIVENESS, all CUTANES ONS ERUPTIONS, PIAPLES, BLOTCHES and all affections arising from

IMPURITY OF THE BLOOD.

It possesses a marvellous efficacy in all complaints arising from Indigestion, from Acidity of the Stomach, from necqual circulation, determination of blood to the head pulpitation of the heart, cold feet and hands, cold chills and not finabes over the body. It has not its equal in Colds and Cough's; and promotee cany expectoration and gentle perpiration, belaxing scrictures of the lungs, throat and every vites part.

Coughs; and promotes easy expectoration and gentle perspiration, telexing strictures of the lungs, throat and every other part.

But in nothing is its excellence more manifestly seen and acknowledged than in all kinds and stages of FEMALE COMPLAINTS.

It works wonders in cases of Finer Albus or Whites, Palling of the Words, Obstructed, Suppressed, or Painful Menses, Irregularity of the mensurual periods, and the like and is effectual in curing all the forms of Kidney Diseases. By removing obstructions, and regulating the general system, it gives tone and strength to the whole body, and thus prevents or relieved a great variety of other mainlies, as Spinal irritation, Neurolgia, St. Vitas' Donce. Successing, Epileptic File, Convulsions, 9c.

It cleaness the blood, excites the liver to healthy action, tones the stomach, and gives good digestion, relieves the bowels of torpor and constituation, Perculation of the blood, producing zenite warrash consilive all over the body, and the meansable perspiration; releases strictures and Radicents moves all obstructions, and mysoches the shift equalities the circulation of the blood, producing zenite warrash consilive all over the body, and the meansable perspiration; release strictures and Radicents moves all obstructions, and mysoches the shift entire persons given. Is not this then

The Medicine you pro-eminently need?

But can any of these things be said of S. P. Townsend's inferior article 1 This young many dioud is not to be COMPARED WITH THE OLD DR'S, because of one GRAND FACT, that the one is iNCAPA-BLE of DETERIORATION, and

COMPARED WITH THE OLD DR'S, because of one GRAND FACT, that the one is INCAPABLE of DETERIORATION, and NEVER SPOILS, while the other DOES: souring, fermenting, and bleving the battles containing it into fragments: the sour, acin liquid exploding, and damaging other goods! Must not this herrible compound be poisonous to the system 1—IPAst put gold instead a system circuly diseased with netd? What causes Dyapapena but acid! Do we not all know that when food sours in our stomachs, what muchief it produces!—datalence, hearburn, palpitation of the heart, liver complaint, diarrhers, dysentery, colle, and corruption of the blood! What is Servitale but an said humor in the body? What produces all the humors which bring on Expitions of the Skio, Scald Head, Salt Rheum, Erysipelis, White Swellings, Fever Soves, and all ulcerations internal and external? It is nothing under heaven but as acid substance, which sours, and thus spoils all the fluids of the body, more or less. What causes Rheumalism but a sur and acid fluid which manitudes itself between the joints and elsewhere, irritating and infaming the delicate insues upon which of deranged circulation, and hearly all the alimants which afflict human nature.

Now is it not horrible to make and soil, and infamilely stores to use this SOUIRING, FERMENTING, ACID "COMPOUND" OF

which afflict human nature.

Now is it not horrible to make and cell, and infinitely series to use this

Memphis, Tenn., March, 1850.

The Faculties, for intellectual abilities, moral worth and professional acquirements, will compare favorably with the most distinguished in our country.—The Medical Faculty constitutes an anomaly in this or any other country—all of them are able lecturers and the best of teachers.

Those who will contemplate our geographi-

the best of teachers.

Those who will contemplate our geographical position and the extent of our population, our have no doubt as to the eligibility of our situation for an enterprise of the kind. As to health, including all seasons of the year, we deny that any ormen cry has none.

A common error exists in the minds of many students relative to the place of studying medicine: those who intend practicing among the diseases of the west and south should certainly educate themselves at a school whose Faculty are practically acquainted with these diseases. That the public may be astisfied of the permanency of this school, we feel it our duty to state, that the Trustees and Faculty form a unit in action, which sugars well for its faints success, and that the peculiar internal organization which connects them, cannot be interrupted.
